

The Giorik ST "Hi-Touch" grill will reach temperature on demand in seconds, dramatically reducing power consumption by up to 70% !! Fitted with 3 pre programmable grill time settings, cook and hold ability, automatic plate detection, on/off switch, height adjustable grill head and easy-to-clean glass heating shield. These units can run off a standard 26 amp 230v supply

**Benefits:**

- Energy saving of up to 70%
- Large grilling area accessible from 3 sides
- Reduced heat in the production area as grill does not need to be left switched on
- Durable reinforced glass panel with touchscreen controls and audible electronic timer
- 3 pre-programmable grilling times with cook and hold ability to allow automatic as well as manual grilling.
- Energy saving plate detection bar - engages heating elements on/off when loaded/unloaded
- High powered heating elements - with a choice of element selection - all 'on' or individual elements 'on' for better energy saving!
- Grilling Intensity/Height adjustable grill head – as close as 25mm above product
- Easy-to-clean removable grill tray
- Wall bracket supplied as standard
- Hygienic and durable 304 stainless steel construction
